- **US PATENT # 11,299,928 & 11,187,323**

**Description:** OverviewFeaturing FHC's ADVANCE UNITIZING GASKET, which eliminates the hassle of installing clamping jaws separately from the stile housing and inserts onto the glass panel's edge as a one-piece assembly. Our mechanical clamping system eliminates the use of cumbersome tapes and sealants, as this is a true dry attachment system that can be adjusted and removed, just as easily as it is installed. Custom fabrication is available, please email us at [architectural@fhc-usa.com](mailto:architectural@fhc-usa.com) or give us a call at 888 295 4531.
